Emlyn,

I don't think they've been changed. We'll fix these, work on others.
Thanks.

Hi, Ed:

Sorry that I missed your call. Just confirming that I received both your voicemail and your email on this matter. From my notes, you had sent me drafts for these facilities in 4/3/13 and I had provided comments back to you on 7/29/13. Have these memos been updated since my last comments? As I remember the main comment was that you needed to provide a complete RACT analysis to show how the respective modifications will still comply with the currently SIP-approved RACT for the 1-hour, which should also suffice as a re-evaluation/update for the 1997 8-hour std. I would appreciate if you could verify if you've made the necessary changes, so I do not have to review something I already have, and focus on the other memos that you've been sending my way.

Thanks,

Emlyn,

I found these memos that were done last year for the past Honeywell (Sunoco - Frankford), Kinder Morgan, and Temple - Health Sciences RACT modifications. The format isn't quite the same, but they appear to be a good starting point. Please let us know if you have any comments on them.
